Possible Sources of Aerial Photographs

1. CALLIGERIS has submitted information concerning persons who might be of use to you in obtaining aerial photographs and maps of Guatemala. It is stated that there are American advisers employed in the map or geodetic section at the Aurora airport, and that these persons have control over all photographs and maps there. In addition, CALLIGERIS says that [], an engineer who has come to school in the States, now works in this section, and that [] also an engineer, formerly was employed there. The latter is married to the sister of [], and is reportedly familiar with many details and matters of interest.

2. For the procurement of new photographs of particular points there exists an engineering firm which has all the equipment needed. This concern is owned by [] and [] and CALLIGERIS suggests that the former be contacted. Ing. [] who is allegedly engaged in a similar business, is well known to CALLIGERIS, and is regarded as sympathetic to the latter's organization.
